

SSIS Update

Issue 274

Social Services Information System

February 6, 2009

Outcome charts updated

SSIS's Outcome Charting web page displays new federal and state indicator charts. These were updated after Version 5.2's statewide implementation. Many new indicators are available, including composite measures used in the current Child and Family Services Review process - Round 2 federal indicators. Some significant calculation changes were made to more closely mirror actual federal calculations. Changes were also made to the data grids behind the charts for increased clarity.

Round 1 federal data indicators are retained in Charting and Analysis for agencies who want to continue using them.

CountyLink's [Outcome Charting](#) pages include new charts for:

- Federal indicator 7.1 (in Round 1)
- All Round 2 Federal indicators
- State indicators #10, 11, 12, and 13.

Upload Update

The next upload is due on February 27. February's upload provides a general update of information for statewide research and reporting.

CountyLink Updates

- ◆ Clearing training module
- ◆ Charting and Analysis module
- ◆ V5.2 Release Notes
- ◆ V5.2 Known Bugs Report
- ◆ V5.2 What's New?
- ◆ VA-CEP Tip Sheet
- ◆ MPAC meeting minutes, 1/16/09
- ◆ Worker Mentor HINT: View Intakes Total
- ◆ Federal (Rounds 1 and 2) and State charts
- ◆ AFCARS Tips
- ◆ AFCARS Cross Reference

Training modules consolidate past handouts

Several updated training modules consolidate instructions and navigation described in earlier handouts. Those initial documents from earlier versions no longer display on CountyLink. Instead, workers can rely on the Claiming, Clearing and SDM modules for comprehensive Version 5.2 instruction.

All Worker and Fiscal training modules are at [CountyLink>SSIS>Training>Modules](#).
