---

---

---

---

---

**Why is SSIS Changing to ICD-10 CM?**

- Federal Health Insurance Portability and Accountability Act (HIPAA) law requires the use of the International Classification of Diseases, Tenth Edition (ICD-10 CM) nationwide as of October 1, 2015.
- All Health Care Providers are expected to use ICD-10 CM and have received training.
- Payments to providers, including reimbursement to local agencies, require using ICD-10 codes for services provided on 10/1/2015 or later.
- SSIS added this requirement in Version 14.3 before the implementation date was delayed one year by Congress.

---

---

---

---

---

---

---

---

**Why is SSIS Changing to ICD-10 CM, Continued?**

- From the Federal Website, Medicaid.gov, ICD-10 CM is replacing ICD-9 for the following reasons:  
*The practice of medicine has changed dramatically in the last 25 years or so. There have been many new conditions discovered, many new treatments developed, and many new types of medical devices have been placed into service. The ICD-9 code set was not designed to capture all of this progress, and as such, has become bogged down with many types of modifications to attempt to capture information. The ICD-10 code set is much better at describing the current practice of medicine, and has the flexibility to adapt as medicine changes.*
- *Diagnosis codes and procedure codes permeate almost every business process and system in both health plan and provider organizations. Diagnosis codes are key for determining coverage and are used in treatment decisions. From plan design to statistical tracking of disease, these codes are a crucial part of the way health plans — including State Medicaid agencies — run their programs.*

---

---

---

---

---

---

---

---

### Why are Multiple Code Sets in SSIS?

- ICD-9 Diagnosis Codes will remain in the SSIS application as Agencies have up to one year after the month of service to submit claims using these codes.
- SSIS added ICD-10 codes in Version 14.3 before the implementation date was delayed one year by Congress.

---

---

---

---

---

---

---

---

### DSM-IV

- The American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders, 4<sup>th</sup> Edition was originally published in 1994.
- It was revised in 2013 and is now called the Diagnostic and Statistical Manual of Mental Disorders, 5<sup>th</sup> Edition (DSM-5).

---

---

---

---

---

---

---

---

### MOVE TO BETTER PLACE LATER SSIS is Not Implementing DSM-V Codes

- DSM-5 references the related ICD-10 codes, so it is not necessary to implement them in SSIS.

---

---

---

---

---

---

---

---

### Minnesota DHS Guidance on ICD-10

- DHS Mental Health Staff Division instructed mental health providers responsible for diagnosing clients that effective April 1, 2014 they should begin to evaluate for ICD-10-CM diagnosis. Because of the listing of the ICD-10-CM codes in the DSM-5, training that is focused solely on the ICD-10-CM is not necessary for clinicians to learn the appropriate codes for billing purposes.
- Beginning April 1, 2014, mental health professionals using DSM-5 criteria must clearly document a client's diagnosis when identifying the description between the different code sets. Even though DSM-5 references ICD-10, **there is not always a one to one match between DSM-5 and ICD names/diagnoses.** Because of these differences some diagnostic assessments or letters from mental health providers to counties and tribes may contain different diagnostic descriptions from three code sets.

7

---

---

---

---

---

---

---

---

### Examples

- Example of three different code set descriptions:
  - DSM-5 - a new diagnosis called Disruptive Mood Dysregulation Disorder
  - ICD-9 diagnosis is 296.99 - Other specified episodic mood disorder
  - ICD-10 diagnosis is F34.8 - Other persistent mood (affective) disorders
- County and tribal staff should select ICD-10 code (F34.8) in SSIS.

### SSIS Update Articles on ICD-10 Implementation 2014-2015

- Update 386, page 5
- Update 391, Page 2
- Update 392, page 1
- Update 406, page 1
- Update 409, page 4

9

---

---

---

---

---

---

---

---

### Use of ICD-10 in SSIS

- The Fiscal standard is ICD-10 codes are available.
- It is only a requirement that they be used for claiming 10/1/15 and after. So if a client has an ICD-10 Diagnosis of XYZ they have that diagnosis now and a current or past date would be entered as the effective date of the diagnosis.
- SSIS will determine, based on service dates, if the claim should have the ICD-9 or ICD-10 code included.

10

---

---

---

---

---

---

---

---

### Worker Entry of Client Diagnosis

- Based on Program area requirements, workers enter a client's diagnosis.
- Entry of Client diagnoses can assist workers with case management service needs.

### Can We Figure Out ICD-10 Codes for Clients When Not Received From Providers?

- Answer: No. Local Agency workers cannot cross-walk DSM-IV, DSM-V, or ICD-9 CM codes.
- Providers must use ICD-10 codes per HIPAA.
- ICD-10 codes number approximately 68,000 to ICD-9-CM number of approximately 13,000 to DSM-IV number of approximately 1,000.

---

---

---

---

---

---

---

### Entering ICD-10 Diagnosis Codes

- Enter the ICD-10 Code number.
- The Diagnosis Description auto-populates.

The screenshot shows a form with three main sections:
 

- Type:** A dropdown menu set to 'ICD-10CM'.
- Code:** A text input field containing '24.8'.
- Diagnosis:** A text input field containing 'Other postmenstrual tubal ligation disorders'.

 Below these fields, there is a label 'Diagnosis code effective dates: 10/01/2015 to present'. At the bottom, there is a section for 'Client's Diagnosis Information' with fields for 'Diagnosis Start Date' (set to 10/1/2014) and 'Diagnosis End Date', and a 'Primary Diagnosis' checkbox which is checked.

---

---

---

---

---

---

---

---

---

---

### Click the Code Search Button

- The ICD-10 Code Search displays. However, either the Code or Description must be known before Search results to display to select for the client.

The screenshot shows the 'ICD-10 Code Search' window. It has a sidebar on the left with options: 'ICD-10 Search', 'ICD-10 Code Search' (which is selected), and 'Advanced ICD-10 Code Search'. The main area contains:
 

- A search type dropdown set to 'Search by code'.
- Fields for 'Code' and 'Description'.
- A 'Search' button.
- A 'Clear' button.
- A status bar at the bottom that says '<No data to display>'.

---

---

---

---

---

---

---

---

---

---

### Advanced ICD-10 Code Search

The screenshot shows the 'Advanced ICD-10 Code Search' window. It displays a list of code ranges and descriptions:
 

Range	Description
200.00	Other infectious and parasitic diseases
200.01	Respiratory
200.02	Diseases of the head and neck including cysts
200.03	Diseases, infection and parasitic diseases
200.04	Wounds, abscesses and furuncles (suppurative)
200.05	Diseases of the nervous system

 A callout box with an arrow points to the vertical scroll bar on the right side of the list, with the text 'Note scroll bar on each section'.

---

---

---

---

---

---

---

---

---

---

### Viewing Chapter and Block Codes

- Click on either a specific Chapter or Block and the beginning of these ICD-10 Code and Diagnosis Descriptions display.
- Information on whether a code is claimable also displays.

---

---

---

---

---

---

---

---

### Diagnosis Grid Lists all Entries

Type	Code	Diagnosis	Primary Diagnosis	Diagnosis Start Date	Diagnosis End Date
ICD-10-CH	F34.8	Other persistent mood affective disorders	Yes	07/28/2014	
ICD-10-CH	600.1	Psychosocial neurosis	No	04/02/2015	06/07/2015

Diagnosis code effective dates: 10/01/2015 to present

Client's Diagnosis Information  
 Depression Start Date: 04/06/2015    Depression End Date: 06/07/2015

Primary Diagnosis:  Yes  No
