

Human Services Systems Status & Upgrade Planning

July 15, 2015
Thomas Kine

MN.IT Services @ Department of Human Services

AGENDA

- MN.IT Central and MN.IT @ DHS Organizational Structure
- DHS IT Governance Structure
- Major DHS Projects – Systems Modernization
- MN.IT @ DHS – County Coordination and Collaboration

My Background

- Employed in technology since 1975
- Contractor at DHS starting in 1993 working on SSIS
- Employee at DHS for approximately 10 years
 - Systems Architect
 - Development Supervisor
 - SSIS Division Director
 - Microsoft Application Division (MAD) Director
- About 60 technical staff in division
 - Variety of systems – around 150 in total

MN.IT Background

■ History

- In 2011, OET's enabling statute was amended to consolidate the management of all information technology systems, budgets, services and resources under OET, significantly increasing the organization's responsibilities.
- In April, 2012 the Office of Enterprise Technology announced a name change to MN.IT Services.
- The expanded organization now encompasses over 2100 staff and a \$400 million+ budget.

MN.IT Services Functions

- **MN.IT provides three critical functions:**
 - MN.IT offers a catalog of more than 100 IT services and provides technical support to the State of Minnesota's executive branch and to other customers in Minnesota government.
 - MN.IT's state IT planning and investment oversight role includes portfolio management and contract approvals. We provide an enterprise view of State IT activity that highlights opportunities for collaboration and helps state leadership prioritize investments.
 - Policies and standards maximize Minnesota's efficiency. MN.IT manages the enterprise IT governance and planning process for the executive branch in the areas of standards, policies and priority enterprise direction.
